THE PROBLEM

Doctor

Writes a prescription quickly, by hand

Prescription

Handwriting is often rushed and unclear

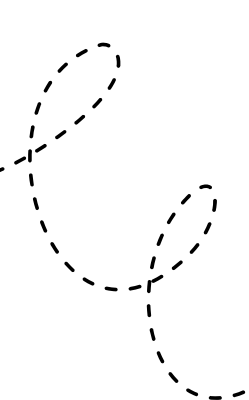

Patient Confusion

Misreads medicine name or dosage

- Doctors' handwritten prescriptions are difficult to read.
- Patients often misunderstand medicine names and dosage.
- Pharmacists may interpret prescriptions incorrectly.
- Wrong medicine and dosage can cause serious health risks.
- Bangladesh still lacks a complete AI-powered prescription understanding system.

WHY THIS MATTERS

Patient Safety at Risk

Prescription errors directly affect patient safety and treatment outcomes.

Handwriting Errors

Poor handwriting increases the chance of medication mistakes.

Vulnerable Groups

Rural and elderly patients suffer the most from unclear prescriptions.

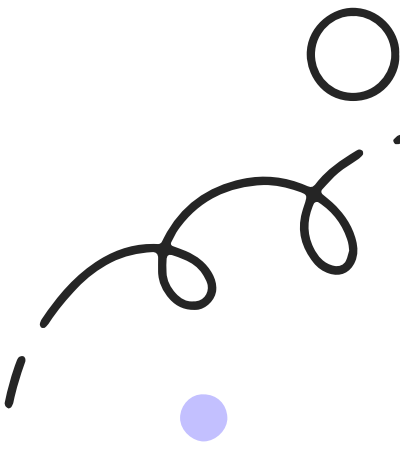

Digital Solutions Help

AI-driven digital healthcare tools can significantly reduce these problems.

OUR SOLUTION

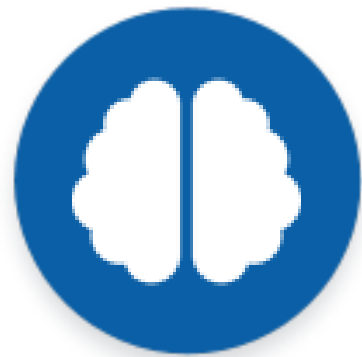

Nirvoy transforms handwritten prescriptions into easy-to-understand Bangla explanations while providing digital healthcare services.

Pharmacy Services

End Result

A patient can photograph any handwritten prescription and instantly receive a clear, spoken Bangla explanation – with the full system also supporting doctors and pharmacies.

.....

PRESCRIPTION RECOGNITION

PURPOSE

Automatically read handwritten prescriptions.

EXPECTED OUTPUT

Digital prescription text with high accuracy.

KEY FEATURES

Upload prescription image

OCR extracts handwritten text

AI detects medicine names

Medical dictionary corrects spelling mistakes

Displays confidence score

Highlights uncertain words for manual review

BANGLA EXPLANATION

PURPOSE

Help every patient understand their prescription.

EXPECTED OUTPUT

Easy Bangla explanation with voice support.

KEY FEATURES

Converts medical terms into simple Bangla

Explains medicine purpose

Shows dosage instructions

Displays timing before / after meals

Text-to-Speech voice explanation

Easy interface for elderly patients

PATIENT HISTORY

PURPOSE

Maintain a digital prescription archive.

EXPECTED OUTPUT

Complete digital medical history.

KEY FEATURES

Login & Registration

Secure cloud storage

View previous prescriptions

Search by date

Track treatment history

Download prescriptions anytime

DOCTOR DASHBOARD

PURPOSE

Enable doctors to generate digital prescriptions.

EXPECTED OUTPUT

Professional digital prescription system.

KEY FEATURES

Doctor login

Digital prescription creation

Search patient records

View patient history

Manage patient list

Reduce handwriting dependency

PHARMACY AVAILABILITY

PURPOSE

Help patients quickly find medicines.

EXPECTED OUTPUT

Medicine availability information.

KEY FEATURES

Search medicine availability

Nearby pharmacy listing

Stock availability

Alternative pharmacies

Estimated medicine availability

Reduce unnecessary pharmacy visits

FAKE MEDICINE VERIFICATION

PURPOSE

Protect patients from counterfeit medicines.

EXPECTED OUTPUT

Medicine verification result.

KEY FEATURES

Scan QR code or barcode

Verify medicine authenticity

DGDA API integration

Manufacturer information

Expiry checking

Authentic / Fake status
